

Script installation

- ☐ Download the pack from the store, *Your Products* tab.
- ☐ Copy the pack content into your server and unpack it in the app/Modules/ catalog.
- ☐ Start the module in the script's admin panel in the *Settings - Manage Modules* section

Manual

1. Referral Contest tab:

- Settings:
 - ☐ **Show finished referral contests**, this option allows the users to view the results of already finished contests..
 - ☐ **Show future referral contests**, this option allows the users to view the terms and conditions of the contests that has not started yet.
- Current contests:

Here you can see all available contests recorded in the system, past, current and future. You can view, edit or delete them.
- Add contest:

Here you add a new contest for the best referral:

 - ☐ **Contest name**, title of the contest; has an informative function, and is displayed at the user's side.
 - ☐ **Contest description**, here you can put any content. This place is intended for a description of the contest's terms and conditions. This description is displayed at the user's side.
 - ☐ **Contest period**, the time, which the contest is available for. This time framework serves to count the referrals, who joined to the contest.
 - ☐ **Activity**, here you can count only such users, who viewed a certain number of advertisements. Its purpose is to protected from so-called empty registrations.
 - ☐ **Prizes**, here you can add financial prizes for certain places in the contest, and select the account, which the bonus will be added to.
